Living in the best city in the world has its perks. With great people and a ridiculous amount of fun to indulge in, making money and more, we have it pretty good. However, the G20 Summit Martial Law in June showed us how our freedom can be taken away quickly. And by whom. If we look.

Like the "Post 9/11 World", the "Post G20 Martial Law World" in Toronto, Canada, is now where we live. We need to figure out what happened and what's going to happen next as best we can. That's the only way to protect ourselves from future threats from a system that treats us like this.

Toronto experienced the most traumatic event in our history with 20,000 cops, troops, mercs and spooks sent to "lockdown" (a prison term) downtown and kick us out for a week in the summer. The whole thing was a set-up. While it was tempting to just forget about it, it could happen again.

Since that's the case and few candidates are speaking on it, I made it my focus before, during and after the "martial law", including by trying to poster and flyer and reach one million people in two months in the hopes that they would reach the rest. Things have been quiet... but for how long?

While many issues are pressing, if our freedom is taken away and we're detained arbitrarily in a paranoid atmosphere that looks like engineered chaos, we won't be able to speak freely again. Or, if we do, most people will be too scared to listen. That's why we should deal with this issue now.

Since we have enough evidence to start creating a local lasting narrative indicting the Federal government, the G20 "world government", the RCMP, CSIS and a few but not all Toronto police, we should figure out how to get all the answers we need now to stop this from happening again.

Below you can find CKLN Radio shows I did in the lead-up to the G20 Summit and protests June 26 - 27th. I was warning people it was a mistake to just go to a fight with the cops set-up by the same government you're against. This whole thing was a set-up and Toronto was the victim of it.

Since we can judge history and facts for ourselves, we can also see how calmly and consistently sharing information is a better idea than protesting, or yelling at cops, getting beaten up and going home. Most people don't like them, so we should practice more appealing ways for us to dissent.

Bonus: There was a "Caribana 2010 Martial Law Lite" this year after the G20 Summit, or hundreds of cops were ordered to mingle in with crowds of young black people partying, as opposed to being nearby just in case. Fortunately everyone acted as well as possible. For details, see [this link](#).
